Hello, everyone! I'm a student in Class 2, Grade 9. I am 15 years old. I like doing sports. But I used to hate doing sports. It was my mother who changed me.

Once I spent too much watching TV and playing computer games. So my grades were worse and worse. My mother noticed my changes. She had a long conversation with me. She said that spending too much on them was bad for my eyes. She advised me to relax by listening to music and doing sports. She asked me to run for an hour in the morning every day. A few days later, I found running could make me healthy and happy. I could do everything better.

In my opinion, when you meet some difficulties, you can share them with your parents or teachers. They will give you some useful advice.
