With the success of *YOLO (You Only Live Once)* 《热辣滚烫》, the topic of losing weight in a healthy way becomes hot again. During the interview, Jia Ling, the main role, gives us some advice.

First of all, we should learn to control our diet and it's a good idea to eat some low-fat

food, like fish, fruit and vegetables. Besides, we had better drink more water. She advises us to drink at least eight cups of water so that we won't feel hungry easily. And remember the ways of exercise we choose must be fit for us, such as running, swimming and doing yoga. Also, don't forget to plan our time properly, so we can get into good living habits. Above all, it's necessary that we have a strong will to keep doing it.

As far as I'm concerned, we can achieve success as long as we stick to the end. Losing weight is certainly good for our health, but remember to do it in a scientific way.
